

Description

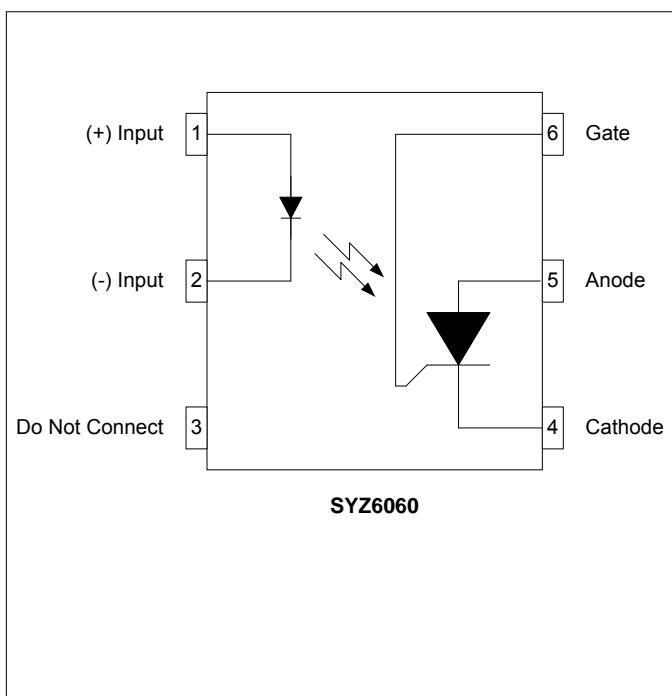

The SYZ6060 consists of a single input AlGaAs LED optically coupled to a photo-sensitive SCR. Optical coupling provides high isolation levels (up to 5kV_{RMS}) while maintaining low-level DC signal control capability. With high load voltage and low input current, the SYZ6060 is an ideal solution for driving SCRs, Triacs and Solid State Relays.

The SYZ6060 comes standard in a compact 6 pin DIP package making it ideal for high-density board applications.

Applications
